B.1. Option 1: Setup Azure Databricks Workspace	3
B.1. Option 2: Signup for Databricks Free Edition	4

A. Included Files

All code and data files are available in Resources section of course.

1. CodeFiles folder
 - a. Contains code files for all modules.
2. DataFiles folder
 - a. Contains files that needs to be uploaded to Databricks volume.

B. Databricks Setup

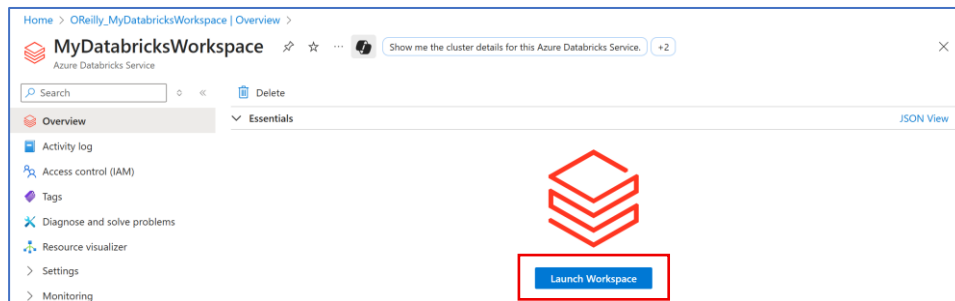

B.1. Option 1: Setup Azure Databricks Workspace

1. Azure subscription – Use your own or sign up for free with below link:
<https://azure.microsoft.com/en-in/free/>
2. Go to Azure portal (portal.azure.com).
3. In the search bar, search for Azure Databricks. And select it.
4. Click on **Create**.
5. Fill up the properties to create account
 - a. [Basics Tab]
 - i. Subscription: Select your subscription
 - ii. Resource group: Click **Create new**, provide a name (example – PluralsightDemos), and click Ok
 - iii. Workspace name: Provide a unique name
 - iv. Region: Select region of your choice (example – East US 2)
 - v. Pricing tier: Premium
 - vi. Click **Review + Create**.

The screenshot shows the 'Create an Azure Databricks workspace' form in the Azure portal, specifically the 'Basics' tab. The form is divided into two main sections: 'Project Details' and 'Instance Details'. In the 'Project Details' section, there are dropdown menus for 'Subscription' and 'Resource group', with a 'Create new' link next to the Resource group dropdown. In the 'Instance Details' section, there are dropdown menus for 'Workspace name' (containing 'MyDatabricksWorkspace'), 'Region' (containing 'East US 2'), and 'Pricing Tier' (containing 'Premium (+ Role-based access controls)'). A blue information box below the Pricing Tier dropdown states: 'We selected the recommended pricing tier for your workspace. You can change the tier based on your needs.' At the bottom of the form, there is a text input for 'Managed Resource Group name' with the placeholder 'Enter name for managed resource group'. Navigation buttons at the bottom include 'Review + create' (in blue), '< Previous', and 'Next : Networking >'.

- b. Click **Create**.
 - This will take a few minutes to deploy.

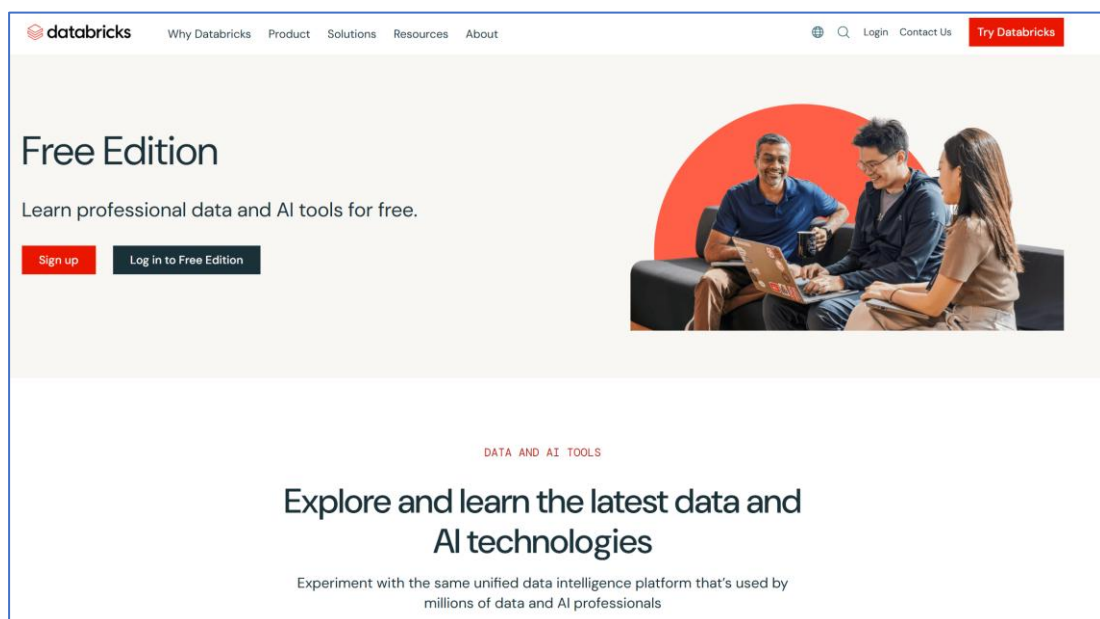

6. Open Azure Databricks instance created in the previous step.
7. Click on Launch workspace, to open Databricks UI.

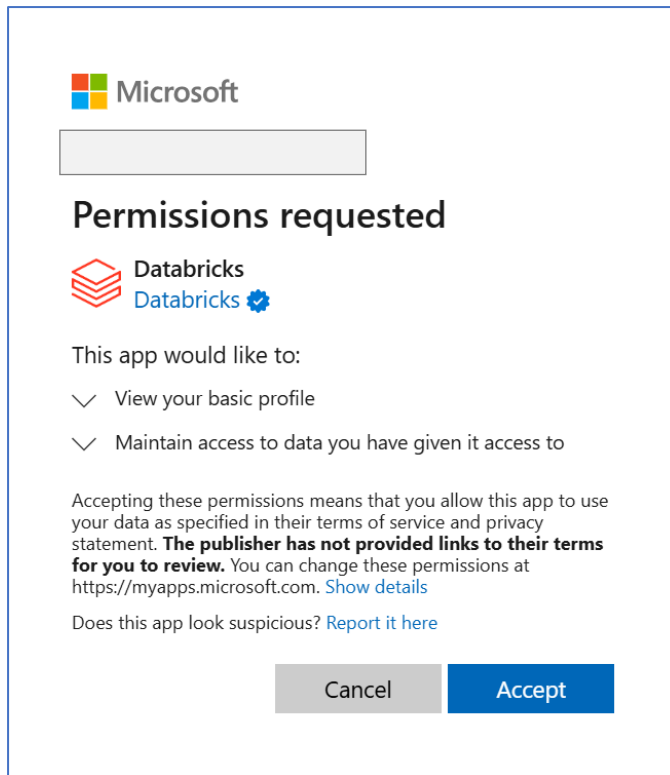

B.1. Option 2: Signup for Databricks Free Edition

Note: If you are using Databricks Free Edition, you will **NOT be able to create an additional **SQL warehouse**. But you will be able to do all other activities.*

1. Go to Databricks Free Edition sign up page (<https://www.databricks.com/learn/free-edition>).

2. Click on Sign up, and login and with an email address (preferably personal email address).
3. Provide permissions to Databricks app by clicking **Accept**.

4. Validate your email address by entering verification code.
5. Provide any name to refer to your account, followed by the country and the verification.
 - This will take a few minutes to setup the account.
